

LANCEBOX GROUP

**Amersham & Wycombe College,
Flackwell Heath Campus, High Wycombe**
Phase 1, Block A, Block C, Block D

Project Time: 12 weeks

Price: £244,998.00

This sensitive project comprised of the asbestos removal, internal strip out and structural reconfiguration of the main teaching blocks at the 8 - 9 acre Flackwell Heath Campus of The Amersham and Wycombe College in Buckinghamshire.

This project was carried out in a pre-planned and agreed sequence to ensure that this live college incurred only minimal disruption while our contracted works were carried out.

All of our works were carried out to within the time frame allotted as well as on budget and to the satisfaction of the client, Miller Construction, who have since awarded Lancebox a number of new projects as well as phase 2, Block B at Amersham and Wycombe College to carry out the asbestos removal and high rise demolition.

- ✦ Detailed and intricate attention to detail in the sequencing and planning of our works.
- ✦ Installation of screening, access and egress routes, site compound fencing and edge protection for the roof works.
- ✦ Removal of all high risk asbestos containing materials under fully controlled conditions including asbestolux ceilings, carried out by Lancebox Environmental Services.
- ✦ Internal soft strip works including the demolition of load bearing walls, sections of roofing and temporary propping required to carry out these works.
- ✦ The careful demolition and removal of a concrete pedestrian bridge, external stairs and planters all carried out by Lancebox Ltd.
- ✦ The removal of the sports hall floor and stage construction, CAT and RADAR scanning of the area and the subsequent large internal excavation.

Client: Miller Construction
Site Manager: Robby Kerr, Miller

Project QS: Robert Sweeney, Miller Construction
Demolition Foreman: Danny Samworth, Lancebox Ltd
