

LANCEBOX GROUP

Draper's Academy
Harold Hill, Romford, Essex

Project Time: 12 weeks

Price: £192,000

The Lancebox Group carried out the sequenced asbestos removals, demolition and foundation removals at this 7 acre project on behalf of Kier Southern.

This was our first project for Kier and the works were carried out within programme and budget. Kier have since awarded us a further 12 contracts totalling over £1,000,000.

The Lancebox group are proud to have carried out the following works on this project working in conjunction with Kier Southern and Noble Environmental associates.

- ✦ Removal of all low risk asbestos containing materials throughout the school including unidentified asbestos cement shuttered ducting, floor tiling and textured coating throughout using Lancebox Environmental Services Ltd.
- ✦ Removal of all high risk asbestos containing materials under fully controlled conditions including asbestos insulation boards, pipe work and boiler room sprayed coatings using Lancebox Environmental Services Ltd.
- ✦ Pre-demolition soft strip works to ensure that all waste materials were segregated prior to the recycling processes undertaken to the nearest available waste facility.
- ✦ The sequenced demolition of the school using heavy demolition plant including our high reach excavator carried out by Lancebox Ltd.
- ✦ The breaking up and removal of all slabs and foundations to the site with all suitable hard rubble waste recycled back to our own licensed recycling yard.

Client: Kier Southern

Project Q.S: Shane Baker, Kier Southern

Site Manager: Philip Randall, Kier Southern

Site Foreman: Danny Samworth, Lancebox Ltd
