

Lancebox Group carried out the phased asbestos removals, demolition, brick salvage and foundation removals at this active school set on approx. 9 acres for The Apollo Group's Education division.

Lancebox Group were proud to have successfully carried out the following works on time and within budget.

- ✦ Surveying and removal of both low risk and high risk asbestos containing materials by Lancebox Environmental Services.
- ✦ Phased demolition of The Norwood Block, associated junior school and numerous temporary buildings around the site by Lancebox Ltd.
- ✦ Site management of scaffolders while erecting demolition scaffolding for the high rise demolition of Norwood block using heavy demolition plant including high reach excavator with mucher attachment by Lancebox Ltd.
- ✦ Pre-demolition soft strip of all buildings to ensure all waste materials are segregated prior to the recycling processes undertaken at a local transfer facility.
- ✦ Breaking up and removal of all slabs and foundations to all buildings, with all hard rubble waste removed by our fleet of HGV's and recycled back at our own licensed recycling centre.
