To whom it may concern

I can confirm that Lancebox Limited carried out the removal of the foundations and concrete slab on our Lynton Road project.

The workforce on site were excellent in their approach to the project and fully understood the time restraints against them. They were knowledgeable in health and safety and were always properly attired.

The management team at Lancebox were readily available to offer support and advice when called upon.

I would have no issue in using Lancebox again and have since included them on a tender list for a much larger project.

Regards/

Chris Phillips
