To Whom It May Concern,

Lancebox Limited carried out the complete north block school demolition and asbestos removal at Drapers Academy in Harold Hill, Romford. The project was worth £192,000.00 in total was carried out within schedule and on budget. The project did have complications but Lancebox were professional in their response and offered help and advice when asked. The project involved the complete strip out and removal of asbestos containing materials from a former school which was then completely demolished down to and including the slab and foundations. I found Lancebox's management before, during and after the works to be of an extremely high calibre. The men on site were also exemplary in their approach to both, health and safety as well as the need to progress the project at a good rate. I would not hesitate in using Lancebox on future projects and express my thanks for the work they have carried out.

Kier London has been awarded a Contract to construct a new Academy which will consist of a phased redevelopment and amalgamation of two existing education sites into a new "Learning Village". The academy will provide a co-educational facility for 11 – 19 year olds specialising in Mathematics and science
