To Whom It May Concern

We would like to confirm the following reference for Lancebox Ltd. in respect of the works carried out to the 2nd Floor Chemotherapy Unit at Guys & St Thomas Hospital, London SE1.

These works consisted of the delicate phased strip-out and demolition to this area and we are delighted to report that the quality of their work was excellent with the conduct and attitude of their staff, when working on such a sensitive project, both assuring and pleasing.

The works were carried out in a highly professional manner with safe working methods and health and safety paramount, along with consideration for noise and dust and site access for neighbouring wards.

Lancebox have carried out various projects for Hutton Construction and we are yet to report a project where we are unhappy with the service they provide. Hutton Construction would therefore be more than happy to recommend Lancebox to any other company seeking a specialist for demolition, soft-strip and asbestos removal works.

Yours faithfully,

James Murdoch
For and on behalf of
HUTTON CONSTRUCTION LIMITED
