Re: former Stamford House Remand Centre, Cathnor Road, London W12

The London Borough of Hammersmith & Fulham would like to thank the Lancebox Group for the excellent work they carried out at the above project.

These works consisted of the asbestos removal and traditional demolition of this former remand centre and 5 acre complex working within a sensitive residential area.

Working as the principle contractor Lancebox carried out all works within budget and programme and we are delighted to report exceptional quality to their work with faultless management of the site during their possession.

All works were carried out in a highly professional manner to high standards of health and safety with consideration for noise, dust and site access.

Yours faithfully
