To Whom it may concern

REF: Lancebox Reference from Royal Marsden Hospital CYPC

Lancebeox Ltd have carried out works for us on the above project at The Royal Marsden Hospital, Sutton and one of their key responsibilities was to complete the soft strip of the existing Building including some Asbestos removal, demolition of internal walls, roof and removal of sections of the exiting floor slab.

The project was demanding in terms of surrounding environment and timescales. Lancebox Ltd approached the job with a professional and systematic approach.

Their team of operatives were efficient and worked in an organised manner with other trades on site, to meet the demands of the programme.

Their work was demanding within the confines of the existing building and surrounded by the existing Live Hospital.

We have found them to be co-operative, accommodating and self-managing, with a dedicated site manager to oversee the works and liaise with us where necessary. Their operation is supported by a professional team of office support staff.

I would have no hesitation in recommending Lancebox Ltd for this type of work in the future.

Regards

Martin Gaedke
Senior Project Manager
