

HESTON SCHOOL PROJECT

To whomever it may concern

Dear Sir / Madam

Apollo Group's Education Division have contracted Lancebox Group for all Asbestos surveys/ removals

The Lancebox Group management team have been very helpful and resourcesable .The team maintained very good progress on site and were readily available for any questions or queries that arose.

Lance box's site operatives were professional in their approach and appeared knowledgeable about their works as well as health and safety and potential risks to personal health.

The asbestos operatives approached their works with full competence and were extremely professional in their approach on control measures on health and safety issues.

Lancebox Group carried out following works on this project

- . Undertaking of a full demolition and refurbishment asbestos survey to Heston School.
- . Removal of both low risk and high risk asbestos.
- . Testing and removal of additional asbestos found.
- . Demolition of the Norwood Block, Junior School and varying portable buildings around the site.
- . Site management of all sub-contractors including scaffolding which was erected for the high rise demolition of the Norwood Block.
- . Pre-demolition soft strip of all buildings.
- . Breaking up and removal of slabs and associated footings.

Lancebox Group was excellent in their approach and I would not hesitate in using them again or recommending them to others.

R. Fernandes
